

NEAEN IC

INSPECTION CONVEYOR

The NEAEN IC inspection conveyor is designed for monitoring and manual removal of the defective product. It can be integrated into various parts of the production line.

The basic construction of the inspection conveyor comprises a conveyor belt made of food grade PVC, of a white color for optimal contrast with the product, the lighting system along the entire length of the conveyor, and the side margins for rapid removal of the defective product.

The overall dimensions of the inspection conveyor are defined by the required performance, and the number of workers. The working height of the conveyor is determined by the customer. The speed of movement of the conveyor belt is continuously adjustable with the frequency converter.

The configuration and material of the conveyor is suited to the type of product.

Benefits:

- ▶ The contrasting design and bright lighting allows for effortless separation out of defective product.
- ▶ Easy to operate and reliable design.
- ▶ Availability of various options in terms of configuration, to suit the customer's needs

THE EMA EUROPE COMPANY HAS MORE THAN THIRTY YEARS OF EXPERIENCE IN THE DEVELOPMENT, DESIGN, AND MANUFACTURE OF INDUSTRIAL EQUIPMENT FOR THERMAL FOOD PROCESSING

The range of commercially available equipment includes continuous conveyor fryers and ovens, drum fryers, batch blanchers, and continuous drum and conveyor blanchers, defrosters, continuous and batch cookers both atmospheric and vacuum, scraped surface heat exchangers, and a wide range of auxiliary equipment such as washers, conveyors, pumps, homogenizers, and others.

Our company offers a complete cycle service from design of technology projects to the manufacturing of equipment of any complexity in our own production site, located in the heart of Europe, as well as the introduction of the equipment in operation, upholding the warranty and after-warranty service with our own service center.

Having much experience in the practical implementation of projects in the industrial processing of meat, fruit and vegetable products, semi-finished and other products, our company is ready to offer technological consultation, development of the production process of the project, equipment manufacturing, erection supervision, commissioning works, and further maintenance services to its customers.
