

# NEAEN NoCAVITY

VIBRATORY PACKER (VIBRATORY TABLE)

## NEAEN NoCavity vibratory packer for filling lines for products that flow with difficulty

The NEAEN NoCavity vibratory packer is used in filling lines for viscous, foamy, and difficult to dose food and non-food products.

This vibratory packer ensures that containers are uniformly filled with viscous products without allowing any air pockets to form, which might lead to spoilage.

The NoCavity vibratory packer guarantees that each package of your product meets the declared weight per volume.

This vibratory packer is used in filling lines for food and non-food products, such as honey, jam, thick paints with additives, various pastes, and more.

**THE EMA EUROPE COMPANY HAS  
MORE THAN THIRTY YEARS OF  
EXPERIENCE IN THE DEVELOPMENT,  
DESIGN, AND MANUFACTURE OF  
INDUSTRIAL EQUIPMENT FOR  
THERMAL FOOD PROCESSING**

The range of commercially available equipment includes continuous conveyor fryers and ovens, drum fryers, batch blanchers, and continuous drum and conveyor blanchers, defrosters, continuous and batch cookers both atmospheric and vacuum, scraped surface heat exchangers, and a wide range of auxiliary equipment such as washers, conveyors, pumps, homogenizers, and others.

Our company offers a complete cycle service from design of technology projects to the manufacturing of equipment of any complexity in our own production site, located in the heart of Europe, as well as the introduction of the equipment in operation, upholding the warranty and after-warranty service with our own service center.

Having much experience in the practical implementation of projects in the industrial processing of meat, fruit and vegetable products, semi-finished and other products, our company is ready to offer technological consultation, development of the production process of the project, equipment manufacturing, erection supervision, commissioning works, and further maintenance services to its customers.
